KYRYLO MELNYK

IT SPECIALIST / AI AUTOMATION SPECIALIST

CAREER OVERVIEW

IT and AI-automation engineer who builds and runs production systems with AI agents. 9+ years in logistics at Nova Poshta, from loader to head of a regional office in central Ukraine.

KEY SKILLS

- AI agents: Claude Code, Codex, n8n
- Python, PHP, JavaScript, SQL
- CRM and API integrations
- Cloudflare, Docker, hosting, cron
- Security audits and backups
- GA4, Tag Manager, ad-platform APIs

WORK EXPERIENCE

IT & Automation Lead

e-commerce, own business | Sep 2024 – present

- Run the full technical side of a direct-response business: online store, 250+ landing sites, CRM, ad tracking, hosting, Cloudflare
- Built the order-intake algorithms: they parse Telegram and file requests with errors and inaccuracies, logically identify the products, and cascade seats, declared value and weight across shipments in Nova Poshta waybills (TTN, the Ukrainian bill of lading, created via API) to match customer expectations and carrier requirements
- Orders flow into the CRM with automatic Checkbox fiscal receipts, plus reports for the warehouse, customers and accounting
- Build AI-agent workflows (Claude Code, Codex, n8n, LLM APIs) and review every change before it ships
- Administer servers, databases, cron and backups; integrate CRM, payment, delivery and ad APIs

Founder & Lead Developer

Prosperity Studio (AI video software) | Aug 2026 – present

- Built a desktop app (Python, PySide6, ffmpeg, OpenCV) that turns a topic into a finished video in several languages
- Shipped 100+ releases in ten weeks; Codex builds the UI, Claude Code the engine, under a written ownership contract

Head of Regional Office

Nova Poshta, central Ukraine | 2015 – 2024

- Rose from loader to head of a regional office through four promotions, leading teams of 40+
- Doubled the region's turnover (2019–2021), then beat that result in a second region (2021–2024)
- Worked daily in Confluence, Google corporate services, a service desk and operational dashboards to run processes and track results

AI PROJECTS

- Online store built by AI agents: ~19,000 products, live on the main domain, 8 end-to-end scenarios green
- Landing-site factory in n8n: 250+ sites on one shared core
- Order and ad pipeline: CRM, Telegram, Facebook CAPI, TikTok Events API
- Zero-downtime migration: 137 identity probes, 0 discrepancies

EDUCATION & LANGUAGES

WUNU (West Ukrainian National University), Vinnytsia Institute of Economics: Bachelor's in Management, 2024 – present
Vinnytsia Professional College of Digital Technologies and Entrepreneurship: Specialist (vocational), PC Operator; Computing Machines Electromechanic, 2007–2010
Ukrainian: native · English: B1 (Intermediate, self-assessed)
